DocuTrust-Bench Evaluation Protocol & Strict Domain Partitioning

Disjoint Document Corpus & Zero Leakage Between Development and Test Splits

Development Set (N = 16)

Used strictly for heuristic tuning & rule calibration

- Document Domain: Civilian Work-From-Home Policy
- Policy Document: 03_Civilian_Work_From_Home_Policy.pdf
- Query Categories:
  - Standard answerable compliance (n = 10)
  - Temporal conflict resolution (n = 3)
  - Abstention / unanswerable (n = 3)

Zero Overlap with Test Corpus (Intersection = Ø)

Frozen Benchmark Test Set (N = 34)

Strict blind evaluation — Zero tuning or feedback

- Document Domains (Disjoint Corpus):
  - Security: 01_Security_Safeguards_Policy.pdf
  - Privacy: 02_Privacy_Data_Protection.pdf
  - Finance: 04_Finance_Expense_Code.pdf
- Query Breakdown:
  - Answerable queries: n = 26 (76.5%)
  - Unanswerable queries: n = 8 (23.5%)

12 Experimental Configurations Evaluated Across N=34 Test Items (408 Inference Records)

Baselines (BASE-A..E) + Iterative (ITER-RETRIEVE) + Ablations (ABL-1..5) + DocuTrust (SYS-FULL)
